2. This is also to confirm that FBIS will fund directly the associated costs connected with the SKYLINK installation, and will be responsible for obtaining all necessary authorizations and concurrences. In this connection, we understand that OC is now thinking in terms of a possible June 1988 installation date. (This was mentioned in a 31 March phone conversation between and the chief of my Field Engineering Division.) If that is the case, we would like to meet with your personnel as soon as possible to discuss and schedule the necessary arrangements that must be made in the very near future to prepare for the installation.
